The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Application/Control Number: 09/884,540
Art Unit: 3632

This is an office action for serial number 09/884,540, entitled Configurable Mount For A Peripheral Device.

### Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-4, 6, 13, 16, 17, 20, 23-26, 28, 29-44 rejected under 35 U.S.C. 103(a) as being unpatentable over Oddsen WIPO 00/25640 in view of Zerbst 2,062,156 in further view of Benz et al. (Benz) 6,192,645. Oddsen discloses a shaft holder, a first member with first and second flanges, a second member with third and fourth flanges, openings, threaded members, clamping plate, and a method of mounting these elements. Zerbst teaches that it is known to have a pin (24) on one element (15) and a corresponding hole or opening in an attaching member (13) to receive the pin therefore preventing the element (15) from twisting relative to the attaching member (13). It would have been obvious to one having ordinary skill in the art at the time

Application/Control Number: 09/884,540 Art Unit: 3632

of the invention to have modified Oddsen to have included the pin to each of the second member third and fourth flange and an opening to the first member flange for the purpose of holding/and aligning and therefore preventing the twisting (page 2 line 70ff) of the first member to the second member. teaches that it is known to have a pair of pins (30) of noncircular shape. It would have been obvious to one having ordinary skill in the art at the time of the invention to have modified Oddsen in view of Zerbst to have included a pair pins to the third and fourth flanges of the second member and a pair of holes or openings to the first and second flange as taught by Benz for the purpose of providing a better means of preventing rotation or twisting (column 3, lines 22ff) since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art which would produce the expected result of a more secure attachment of the first member to the second member and ensure that the members would not twist relative to one another. St. Regis Paper Co. v. Bemis Co., 193 USPQ 8.

# Allowable Subject Matter

Claims 5, 7-12, 14, 15, 18, 19, 21, 22 and 27 are objected to as being dependent upon a rejected base claim, but would be

Application/Control Number: 09/884,540

Art Unit: 3632

allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

## Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

#### Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated

from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
